

Start here.

Nine pages for one meal and the people around it: the bird worked out from its weight, a who-brings-what list that asks whether the dish needs the oven, an oven plan for a kitchen that only has one, the table, the three days before, the day, and Friday.

1 WHAT IS IN YOUR DOWNLOAD

4 fillable kits	Letter + A4 · colour + ink-saving mono · 9 pages each
4 print kits	the same pages without form fields
Start with page 2	the thaw dates decide when you have to buy the bird
This guide	printing and filling in, on one page

2 TYPE ON IT

Open a file ending in **-fillable.pdf** in Adobe Acrobat Reader (free) or a tablet app and type. Tick the boxes with a click. **Save a copy first** and keep it as this year's file — next November it opens with the guest list, the seating and the timings already in it.

3 OR PRINT AND WRITE

The **-print.pdf** files are the same nine pages without fields. Print page 4 whatever else you do and put it on the kitchen wall: it is the oven plan counting back from the hour you sit down, and it is what everyone helping needs to be able to read.

4 PRINT IT WELL

- Paper: plain A4 or US Letter, 90–120 gsm
- Scale: **100% / Actual size** — never “Fit to page”
- White pages on purpose — a colour-filled background eats a cartridge
- Saving ink? The **mono** kit is the same layout in graphite only

5 THE ONE NUMBER THE KIT WILL NOT LET YOU GUESS

A turkey is cooked at **165°F / 74°C** in the thickest part of the thigh and of the breast, with the probe clear of the bone. Colour, timing and the plastic pop-up are all worse than a thermometer. The weight table on page 2 gives fridge thawing times and roasting times as a starting point — they are guides, and the thermometer is the answer. And do not rinse the raw bird.
