

Start here.

Eight pages built around the parts that actually break: starting, capturing, guessing how long things take, and the maintenance nobody wants to think about.

1 WHAT IS IN YOUR DOWNLOAD

4 fillable sets	Letter + A4 · colour + ink-saving mono · 8 pages each
4 print sets	the same pages without form fields
Page 1 is the daily	print that one often; the rest are weekly or as needed
This guide	how to use it, print it, and what it is not

2 HOW TO ACTUALLY USE IT

Start with page 1 and nothing else for a week. One task a day is the whole system; the two extra lines are a bonus, not a target. When your head is too full to pick, do the brain dump on page 2 first. When a task keeps sliding, give it page 3. Skip any page that does not help — **an unused page is not a failure, it is a page that is not for you.**

3 TYPE ON IT OR PRINT IT

Open a **-fillable.pdf** in Adobe Acrobat Reader (free) or a tablet app and type; or print the **-print.pdf** and use a pen. Many people find paper easier to start on and harder to ignore — the daily page is designed to sit on the desk, not in a tab.

4 PRINT IT WELL

- Paper: plain A4 or US Letter, 90–120 gsm
- Scale: **100% / Actual size** — never “Fit to page”
- Print ten copies of page 1 at a time, so the choice is never “print or plan”
- Saving ink? The **mono** set is the same layout in graphite only

5 WHAT THIS IS NOT

This is a planning tool, not medical advice, therapy or a substitute for either. It was designed with well-known ADHD-friendly principles — few choices, visible time, one job per page — but it does not diagnose or treat anything. If something here makes your week harder rather than easier, stop using that page.
