

Start here.

Nine pages built on two things nobody else prints. A shopping list is written in the kitchen, in front of the open fridge — not in the shop, on a phone. And it should be laid out in the order of **your** shop, which is why page 1 asks you to write your aisle order down once and everything after it follows that order.

1 WHAT IS IN YOUR DOWNLOAD

4 fillable kits	Letter + A4 · colour + ink-saving mono · 9 pages each
4 print kits	the same pages without form fields
Fill page 1 first	your aisle order, once — the rest depends on it
This guide	printing and filling in, on one page

2 TYPE ON IT

Open a file ending in **-fillable.pdf** in Adobe Acrobat Reader (free) or a tablet app and type. Tick the boxes with a click. Pages 1, 6 and 8 are filled in **once** and saved; pages 2, 3 and 4 are the ones you reprint or clear every week.

3 OR PRINT AND WRITE

The **-print.pdf** files are the same nine pages without fields. The kit is built to be used that way: fill in page 1 and page 8 by hand once, stick them inside a cupboard door, and photocopy pages 2, 3 and 4 in a small stack. **Page 4 is the one that goes with you** — it is a list in your aisle order, so you walk the shop once.

4 PRINT IT WELL

- Paper: plain A4 or US Letter, 90–120 gsm
- Scale: **100% / Actual size** — never “Fit to page”
- Pages 2, 3 and 4 weekly; 5, 6 and 7 monthly; 1 and 8 once
- Saving ink? The **mono** kit is the same layout in graphite only

5 HOW TO USE IT THE FIRST TIME

Do page 1 and page 8 on a quiet evening with the cupboard open — the aisle order, and the level at which each staple gets re-ordered. That hour is what makes every later week a five-minute job, because the list stops being something one person has to hold in their head. Then run pages 2 to 4 for a week, and keep page 7 for a month before you judge anything: what gets thrown away is the most useful number in the kit, and it takes four weeks to show a pattern.
