Shoes exactly, jumpers one size up

Feet are measured, not guessed, and they are measured at the end of August rather than in July — children grow over the summer and shoes bought early are tight by October. Jumpers and coats can take a size up; shirts and trousers cannot, because a child in clothes that are too big is a child who cannot manage their own zip.

NAMED

[illegible]

The bag comes home. The jumper does not.

Everything that can be taken off during a school day needs a name on the item itself — jumper, coat, PE kit, water bottle, lunchbox, and **both shoes**, inside. It is an hour in August and it is the difference between losing four jumpers a year and losing none.

Pick one and buy enough of it

- ☐ Iron-on tapes — survive the wash, slow to do
- ☐ Stick-on labels — for bottles, boxes and pencil cases
- ☐ A laundry marker on the care label — free, and enough
- ☐ Sew-on, if the school insists

REALLY ———— DIFFERENCE ————

It is never the uniform, it is the twelfth thing

Most people budget for the uniform and the shoes and stop there. The rest of the list above — trips, clubs, photographs, the dressing-up day in October — arrives in letters, one at a time, and is never added up. Total it in August and the letters stop being a surprise.

WHAT COMES HOME UNTOUCHED, EVERY TIME

Read the school's rules once, then stop guessing

Most schools ban nuts outright, and many also rule on sweets, chocolate, fizzy drinks and glass. Write the actual rule here rather than remembering a version of it — and if your child has an allergy, the office needs it in writing and the class teacher needs to have read it, which are two different things.

KIT THAT MAKES IT QUICKER

- ☐ A box they can open themselves, tested at home
- ☐ A bottle that does not leak in a bag
- ☐ Something prepared on Sunday for all five days
- ☐ A spare box, for the day one is left at school

The night before.

Date 7/9

A good morning is made the night before

Every difficult school morning is really an evening that did not happen. This page is meant to be printed once and used every night until nobody needs to read it — which takes about three weeks. Tick it for the first fortnight, then stop; by then it is a habit and the page has done its job.

THE EVENING, IN ORDER — Before anyone is tired, not after

- ☐ Bag emptied — letters, lunchbox, anything wet
- ☐ Tomorrow checked against the week on page 5
- ☐ Uniform out, all of it, including socks
- ☐ Shoes by the door, together
- ☐ Lunch made, or made as far as it will keep
- ☐ Bottle washed and filled
- ☐ Reading book and homework signed and in the bag
- ☐ Bag by the door, zipped

FOR THE CHILD WHO IS SLOW IN THE MORNINGS

- ☐ A clock they can read, in their room
- ☐ One instruction at a time, not a list
- ☐ Breakfast they can start without help
- ☐ Ten minutes earlier, rather than louder
- ☐ The same order every morning, so it stops needing to be said

The first day, and the first week.

Date 8/9

BEFORE

What they are looking forward to

What they are worried about

Who they already know in the class

What we said we would do about it

THE MORNING ITSELF

- ☐ Photograph at the door, before anyone cries
- ☐ Leave ten minutes earlier than you think
- ☐ Say what happens at the end of the day, out loud
- ☐ A short goodbye — long ones are harder
- ☐ Somewhere to go afterwards, for you

WHAT TO ASK AT PICK-UP “How was school?” gets you noth...

- ☐ Who did you sit next to?
- ☐ What was the best bit of lunch?
- ☐ What made somebody laugh?
- ☐ What was hard?

The first fortnight is exhausting, and that is normal

Expect tiredness, short tempers and a child who falls apart at the door at four o’clock having been fine all day — that is what holding it together all day looks like from the outside. Early nights and a light week beat any conversation about it. If it is still hard after three or four weeks, that is when you talk to the teacher.
