

Start here.

Every recipe card prints the two things you already know — ingredients and method — and loses the part that made the dish yours: which pan, what your oven really runs at, what it looks like when it is ready, what goes wrong, and what you changed the second time you cooked it. This kit is built around that.

I WHAT IS IN YOUR DOWNLOAD

4 fillable kits	Letter + A4 · colour + ink-saving mono · 9 pages each
4 print kits	the same pages without form fields
Pages 2 and 3 are a pair	the front and back of one recipe — print them many times
This guide	printing and filling in, on one page

2 TYPE ON IT

Open a file ending in **-fillable.pdf** in Adobe Acrobat Reader (free) or a tablet app and type. For each dish, **save a copy of pages 2 and 3 under the name of the recipe** — that is how the collection is built. Page 1 and page 7 are filled in once and kept at the front.

3 OR PRINT AND WRITE

The **-print.pdf** files are the same nine pages without fields. Print **pages 2 and 3 back to back** and you have a two-sided recipe sheet: the recipe on the front, and on the back the rest of the method, what you changed each time you cooked it, how it keeps and how to reheat it. Run off twenty of them and put them in a ring binder.

4 PRINT IT WELL

- Paper: plain A4 or US Letter, 90–120 gsm — heavier if it lives in the kitchen
- Scale: **100% / Actual size** — never “Fit to page”
- Pages 2 + 3 double-sided, many times; pages 5 and 9 inside a cupboard door
- Saving ink? The **mono** kit is the same layout in graphite only

5 START WITH PAGE 1, AND AN OVEN THERMOMETER

Domestic ovens are routinely fifteen or twenty degrees out and hotter at the back, which is behind most of the cakes that sink and the chicken done on one side. Put a thermometer on the middle shelf, set the dial to 180, wait twenty minutes and write down what it actually says. Then measure your pans. After that every recipe you keep in here can carry the real number and the real pan — which is what makes it repeatable by you, and by anybody else in the house.
